Education Exchange

A New Era of Digital School Safety

## SMART Safety & Security (S3) for Schools

Cloud-based Mobile SMART Management and Training  
for Educational Institutions

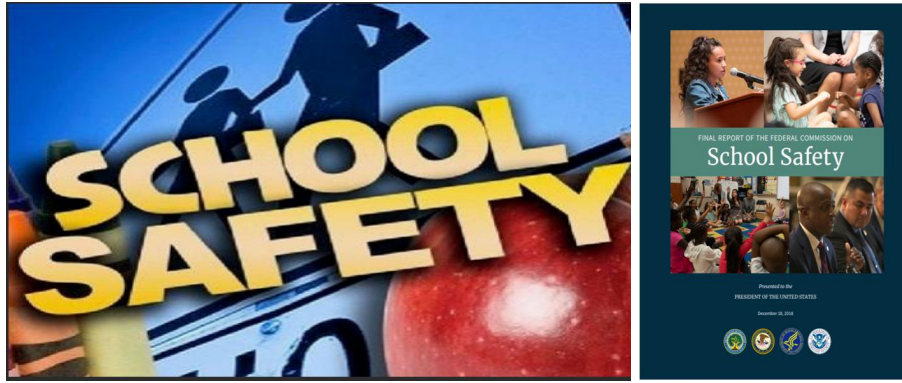

The SMART Safety & Security (S3) is a cloud-based extremely versatile community safety content production and management platform and a personal learning environment, including personal video tutoring.

## SMART Communications & SMART Management

### SCHOOL & COMMUNITY

## Digital School Safety Plan

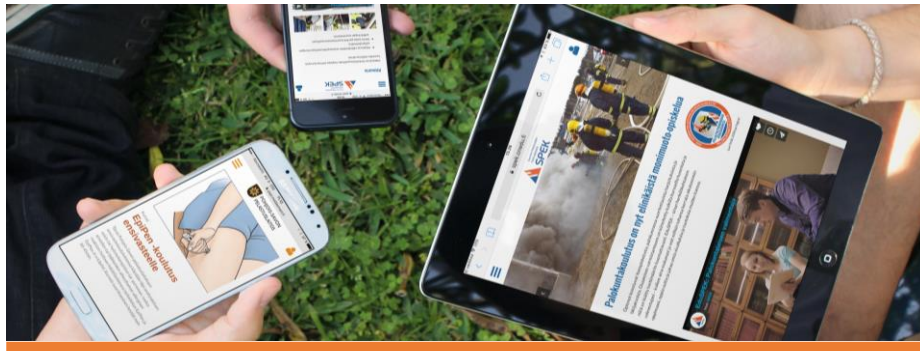

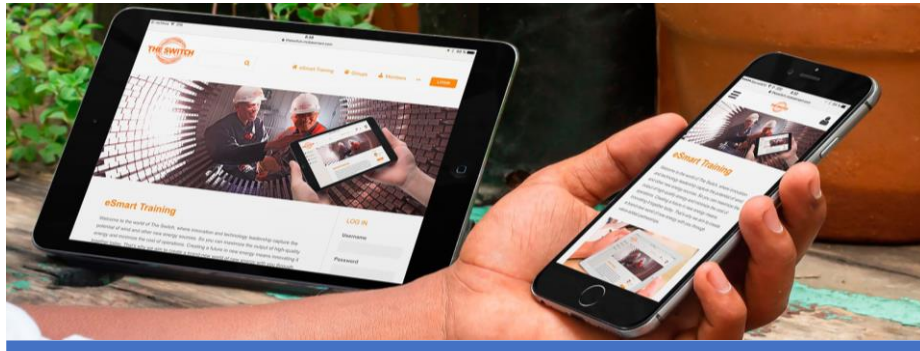

- An HTML5-based responsive online publication.
- Works on all platforms from smartphones to tablets, computers and TVs.
- Can be printed to a pdf file.
- Also works without a network connection.
- Extremely easy, automated content.
- More than 3,600 user organizations today.
- Safety Plan management, training materials, brochures, annual reports, other reports, etc.

## SMART Training and Learning

- Social Learning and Social Micro Learning solve the training and learning challenges of today.
- Micro courses are short, 2–3-minute training sessions which the School Administrators, School Staff, School Resource Officers, and First Responders can do while working, at times that best suit them.
- Add the social element in the form of various discussion forums, chats, video chats and real-time messaging applications, and you have what is called Social Micro Learning .

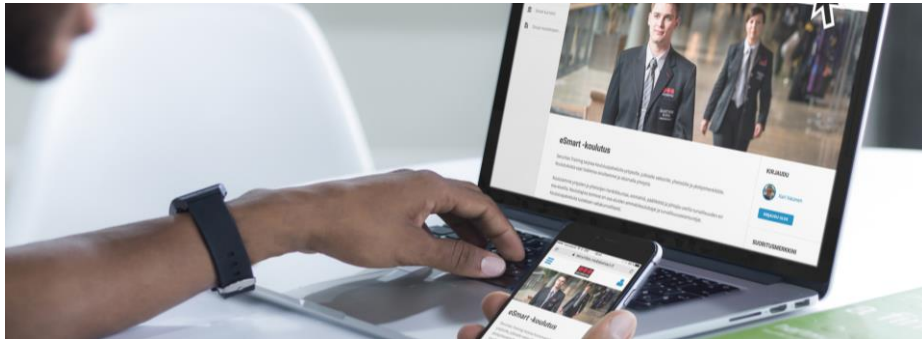

## Extremely versatile – all you need in a single system

### SMART & MOBILE

- A modular and flexible system which easily accepts new features and tools.
- Includes an xAPI interface, enabling course elements created with xAPI-compatible external software to be incorporated into SMART and Mobile content.
- The service has more than 70 different interactive tools, including 360-degree panorama pictures and interactive videos.
- Adaptive learning paths, real-time follow-up, big learning data and learning analytics.

## The Best Possible Security

### SECURE TRAINING & MANAGEMENT

### SAFE & SECURE

- Award-winning and one of the most secure SMART Learning Environments in the world.
- The management and learning solution of choice for many security-conscious organizations.
- The default security level in the system is based on category E (critical online services, i.e. the highest category).
- For maximum security, use a protected USB stick with S3 Offline preinstalled (solution used by international intelligence agencies).

## When you have no network connection

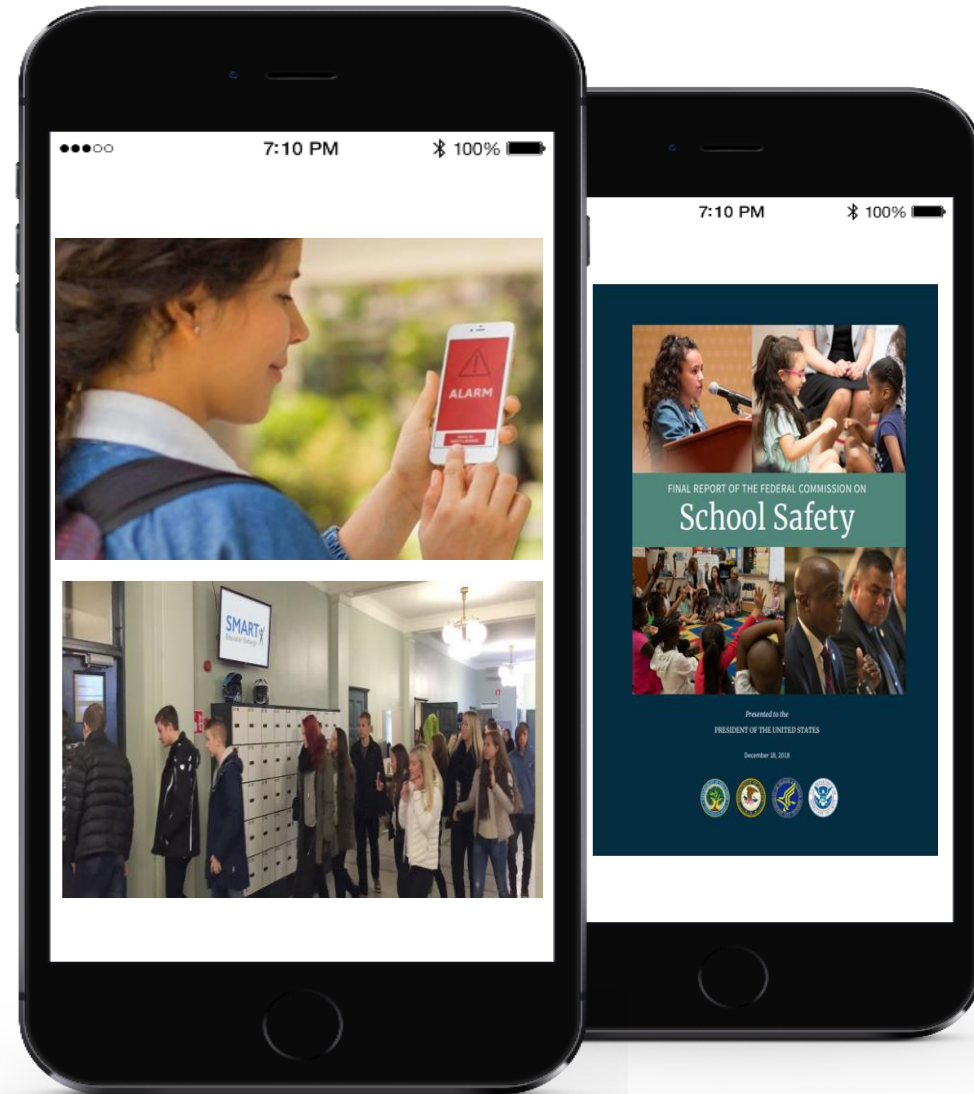

**SMART Safety & Security S3 Offline**

### **ANYWHERE - ANYTIME - OFFLINE**

- Works without a network connection when installed on an encrypted Micro SD card or USB stick. A complete safety management & learning environment with all the same content as the online version.
- Real time-tracking and synchronization with the cloud.
- The highest possible security with S3 offline installed on USB sticks with Military-level protection (pictured).

## Platform-independent

- The S3 content works with full functionality on the users' own smartphones, regardless of the operating system or display size.
- You can create and edit content on your smartphone.
- In the future, smartphones will be the most important medium in training, because they are always carried along, whatever the job.

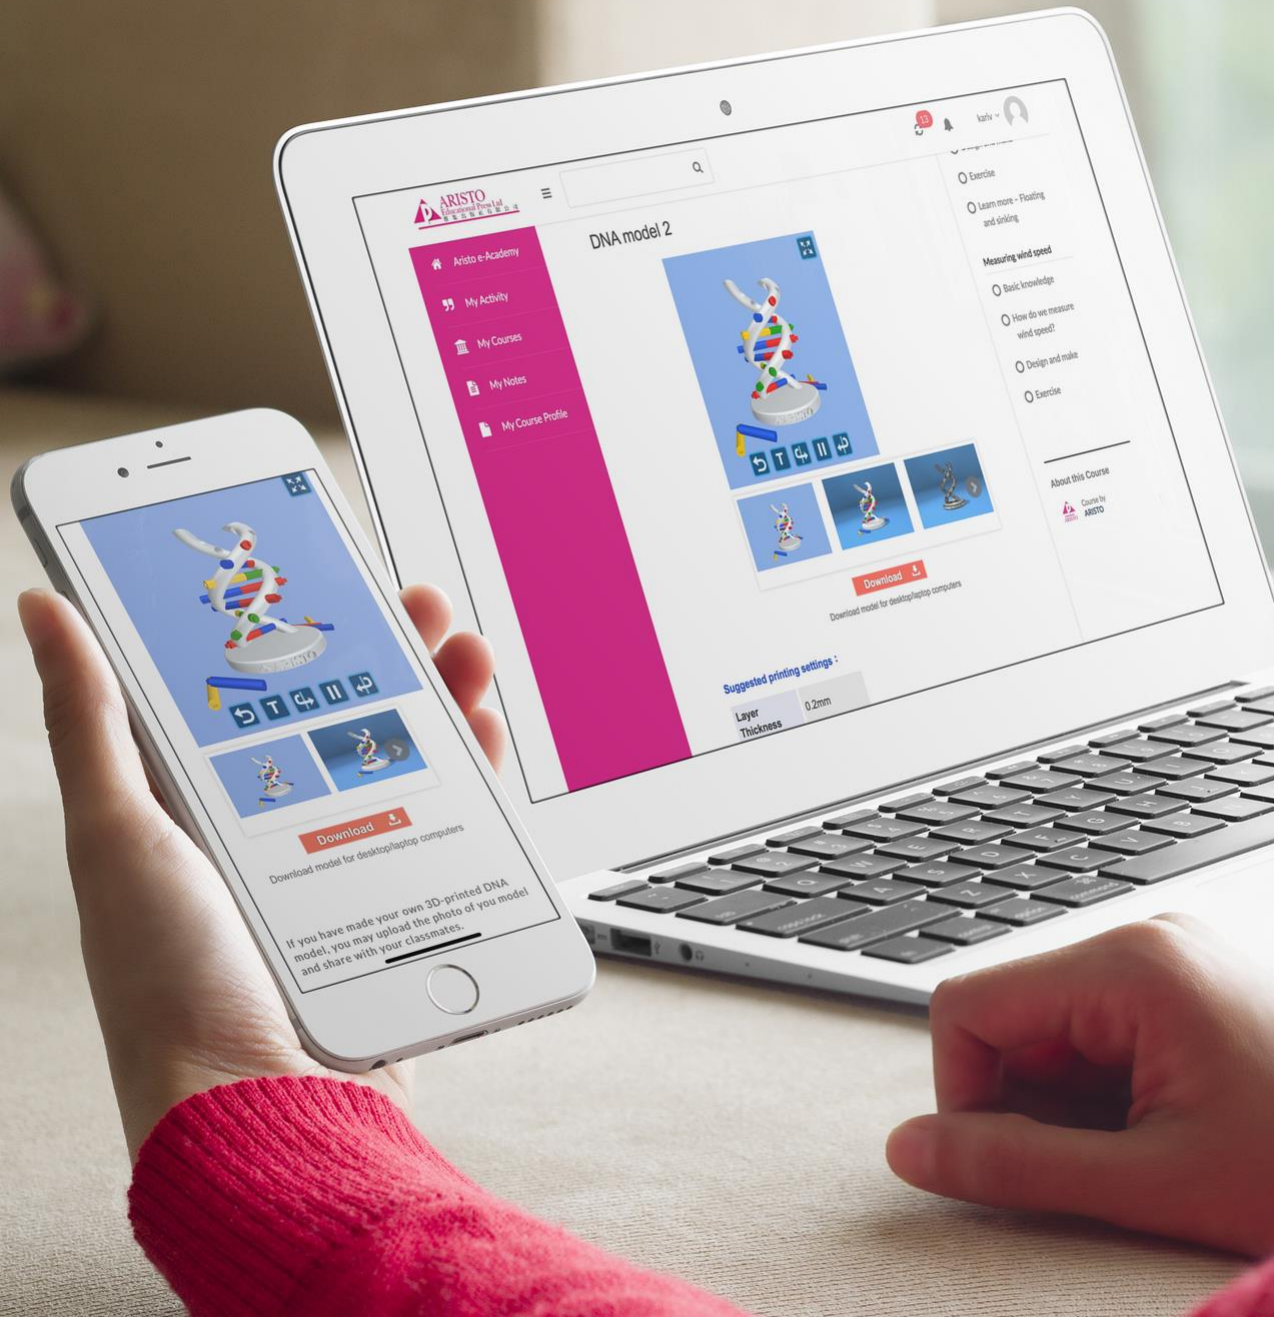

## S3 Benefits

- Lower School Safety & Security program administrative cost.
- Tools for cross agency collaboration with Schools to create a Digital Community Safety Plan.
- Create a 3D model of your campus to share with first responders and school administrators in a crisis situation.
- Deliver training for School Resource Officers and Faculty, Law Enforcement and First/Emergency responders on access and implementation of the program to maximize effectiveness and prevent or reduce consequences.

## The New Era of Digital Community Safety

The S3 represents a new generation of SMART cloud-based platforms. This award-winning SMART environment is one of the most versatile SMART learning environments on the market.

With pedagogics developed in collaboration with over 100 schools and educational institutions, 2,500 Educators and 40,000 Students, it is superbly adapted to the needs of educational institutions, companies and organizations.
