

Chamber of Eco Commerce

### **SMARTVeterans2020**

Chamber of Eco Commerce in partnership with SMART Community Exchange will deliver SMARTVeterans2020 workforce development and training program to U.S. communities.

The program engages educational institutions, government agencies, economic development agencies, trade organizations, and enterprises in SMART workforce development through [SMART community development](#) and [SMART Opportunity Zone](#) projects across the U.S.

We are committed to empower U.S. Military Veterans of all ages. Our advocacy efforts are geared to ensure that all Veterans obtain the best job training so that they become the most successful and adjusted in our nation's history. We enhance the skills of our Veterans through training that expose them to SMART, new opportunities, enhance their job skills, empower their economic independence, and help foster them readjustment to civilian life.

### ***SMART Workforce***

The key aspect of our program is comprehensive hands-on job training and reintegration workforce training. This is one of the most critical parts of a Veteran's readjustment to civilian life. While serving, many veterans learn real life professions but there is a large portion of our servicemen and women that do

not. Our plan to help reintegrate these Veterans into society through [vocational training](#). Along with our valued community partners, we can offer our Veterans the head start and marketplace job training they will need to re-enter society as productive citizens.

### **Training Programs**

All SMARTUSA2020 workforce development and professional development programs are provided and supported by community partners, all size enterprises and organizations representing numerous industries. These training programs help community and corporate partners maintain a competitive advantage by preparing workers for SMART skill sets needed tomorrow as well as today. Training is versatile and regimen is shaped specifically for the skills that U.S. communities and corporate partners are looking to develop in their SMART workforce and employees. Training is conducted and delivered through [SMARTx platform](#) or live workshops onsite.

### ***SMART Safety Security S3***

[The S3 program](#) also unites the skills and experiences of military Veterans with other professionals to rapidly deploy emergency response teams into crisis situations. The Veteran-focused response concept; many Veterans returning home after fighting years of war, can find a renewed sense of purpose for their skills and experiences through Disaster Mitigation, Management and Response, as cyber, man-made and weather-related risks present many of the same problems that confront troops; limited resources, unstable populations, horrific sights, sounds and smells. The skills cultivated on those same battlefields – risk assessment and mitigation, teamwork and decisive leadership – are invaluable in crisis situations.
